Job Title: Junior/Intermediate Developer

About Recombo:

Recombo is a rapidly growing software company based in Downtown Vancouver. Our product, Agreement Express, is a cloud based software application that automates any paper-based document approval process through e-signatures. Our product is used by leading corporations in the payments and insurance industries. Our customer base spans over Canada, US, and UK.

Job Summary:

Recombo Inc. is seeking a Junior / Intermediate Level Web Developer to work on a custom web application using a variety of industry recognized open source software.

Responsibilities

- Develop and support a web-based application, with responsive UI, using HTML 5, CSS 3, JavaScript, JQuery, AJAX, XML, JSON, JSP, and JSTL
- Work independently on an agile team on the analysis, design, implementation and support of new features to the existing system
- Communicate effectively with product and project managers, developers, testers and customers
- Participate in the research and evaluation of new tools and technologies

Requirements

- Advanced skills in JavaScript, HTML, and CSS (3+ years)
- Java programming language experience (1+ years)
- MySQL experience
- Understanding of object-oriented programming concepts and practices
- Experience working independently as part of a larger team
- Experience with SVN
- Ability to learn on the job, explore new tools, techniques and technologies
- BS/MS-level degree or equivalent education/knowledge/relevant work experience in web application development
- Experience in developing SaaS applications a plus
- Experience in developing web applications for mobile devices a plus
- Must be eligible to work in Canada without sponsorship.

Please send resume and cover letter to jobs@recombo.com. References will be required for shortlisted candidates.

No head hunters or staffing agencies please.
